

Cessna 208B Grand Caravan

FLEET STATISTICS:

- Over 1500 Caravan aircraft in service today
- 30,000+ flight hours logged each month
- First aircraft delivered over 20 years ago
- Since 1985, Caravan fleet has logged over 7,000,000 flight hours and traveled 500,000,000 miles
- Dispatch reliability exceeds 99.8%

AIRCRAFT DIMENSIONS:

Length:	41.6 feet
Span:	52.1 feet
Height:	15.5 feet

PERFORMANCE:

Cruise Speed (10,000'):	184 knots
Range (10,000'):	907 nautical miles
Takeoff:	1365 feet
Landing:	950 feet
Max. Gross Weight:	8785 lbs.
Empty Weight:	4364 lbs.
Max. Load:	4421 lbs.

MISSION CAPABILITIES:

Cessna's Caravan is used around the world in a variety of roles. Even its short list of specialized applications seems comprehensive: aerial surveillance and reconnaissance work, prisoner transport, photo mapping, patrol, medevac, search & rescue, flood relief, geographic surveying, cargo and personnel transport. And these aren't just things that the Caravan *can* do, but things it *does* do, every day.

Caravans are currently being utilized by aviation agencies in Alaska, Ohio Pennsylvania, Tennessee and Wyoming, as well as numerous Federal agencies, including the FBI, CIA, US Navy, US Department of State and Interior and others.

The Cessna 208B compliments the WV Aviation Division's current Beechcraft King Air 350. While the King Air's primary mission is serving major airports in WV as well as major US cities, such as Atlanta, Chicago, New York and Washington DC, the Caravan expands our capabilities in-state to include all hard-surfaced and most non-hard surfaced runways.
